

**KSVI**

**Department of Software and Computer  
Science Education**

*<http://ksvi.mff.cuni.cz>*

## **(Not only) teaching computer science**

- Groups, individuals, theory, teaching, software...
- If a topic interests you
  - contact the individual directly
  - don't be afraid to come up with your own proposal

Cyril Brom

- Even a programmer **can** become **a teacher!**
- Didactics of Informatics Scientifically (1st and 2nd level)
- What works in the media from an educational point of view
- Development of educational games and multimedia
- Experiments on humans (on children)

## Other topics related to teaching

- Teaching computer science and programming
- Software support for teaching
  - Topics suitable for non-teachers

Tomas Dvorak

Pavel Töpfer

Tomas Holan

Klára Pešková

Lenka Forstová (SISAL)

# Theorists

Tomas Dvorak

## Problems at the boundary of theoretical computer science and discrete mathematics

- Generalized Gray codes between prescribed pairs of strings
- Experimental verification of Havel's hypothesis about hypercube bones
- Compact suffix automat in sliding window

Martin Pergel

(software-engineering theorist)

## Discrete problems and algorithms

- Selected issues related to vehicle routing
- Universal backup
- Algorithmic problems related to intersection graphs
- Creative division game Diplomacy
- Visualization of graphs
- Smart home

# Computer Graphics Group

Elena Šikudová

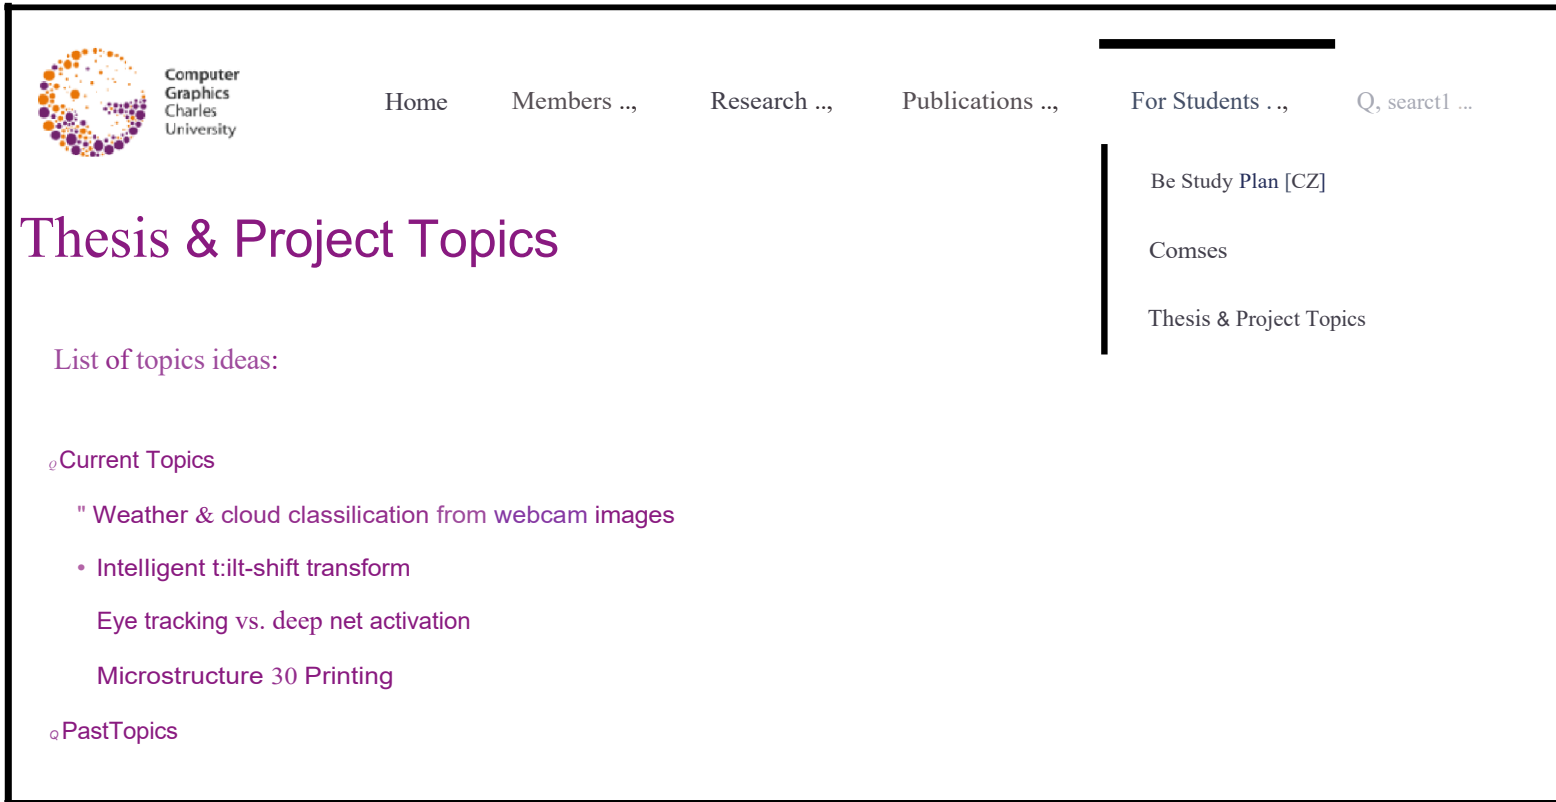

Josef Pelikan

Alban Fichet

- Thesis and project topics appearing throughout the whole year
- Feel free to contact the group members with your own topics

The screenshot shows the website's navigation menu with the following items: Home, Members ..., Research .., Publications .., For Students . ., and a search bar labeled 'Q, searchI ...'. The 'Thesis & Project Topics' page is displayed, featuring a purple header and a list of topics under the heading 'List of topics ideas:'. The topics are: 'Weather & cloud classification from webcam images', 'Intelligent tilt-shift transform', 'Eye tracking vs. deep net activation', and 'Microstructure 3D Printing'. There are also sections for 'Current Topics' and 'Past Topics'.

## Thesis & Project Topics

List of topics ideas:

- Current Topics
  - " Weather & cloud classification from webcam images
  - Intelligent tilt-shift transform
  - Eye tracking vs. deep net activation
  - Microstructure 3D Printing
- Past Topics

# Hey, artists!

Long-term cooperation on a project  
with the Institute of Art History

You can join a research team

- Analysis of PDF journal layout structure
- Data mining
  - Visual
  - Textual

# AI in context, didactics

<http://www.AlvK.cz>

Tereza Hannemann

- AI in context
  - How to teach AI in the perspectives of different disciplines ?
  - How to popularize AI in public space ?
- Didactics
  - How to didactically help to better learn about the digital world
    - socially excluded children
    - people in prison
  - How to teach children and their teachers about

AI ?

# Pomoz nám zkoumat mozek?

## Projekty:

**DATABÁZE:** Data-store modul pro neurální simulátor

**GRAFIKA:** Vizualizátor neurálních modelů

**SOFTWARE ENG.:** Reproducibilný workflow pro simulace

**PARALELNÍ PROG.:** Optimalizace simulátoru na HPC

**WEB:** Web-based prohlížeč neurálních dat

**A DALŠÍ...**

**VÍCE NA:** <http://csng.mff.cuni.cz/> [antolikjan@gmail.com](mailto:antolikjan@gmail.com)
