

ACCESS TIME

pointing just previous type

type CELL;
type LINK is access CELL;

type CELL is

record VALUE : NUMBER
NEXT : LINK;

end record;

N, L : LINK;

initialization to null

L := new CELL;

L := new CELL (37, null);

L : LINK := new CELL (37, null);

N := L kopirajte pointer

L.VALUE := N.VALUE

L.all := N.all

derivation automatically!

L = N ~ L.all = N.all
